## Section A

### (Reading Comprehension)

**Note-** Read the passage given below and answer the questions that follow.

(1) It was evening in the picturesque seaside town of Rameshwaram, on the southern edge of Tamil Nadu. A cool breeze was gently blowing in from the sea. Along with the sound of waves lapping against the shore could be heard the sweet sound of birds circling overhead.

(2) Among the children playing on the beach was a boy with wavy hair and dreamy eyes. This youngster was Avul Pakir Jainulabdeen Abdul Kalam who later became the eleventh President of India.

(3) While spending time with his friends, Abdul was attracted by the sound of the birds flying above. He carefully observed that a fledgling perched on a boat was trying to take off. It spread its wings, fluttered briefly and sprang up. The air seemed to give the needed thrust for its take off! The bird soared up into the sky. It steered its pace and course with great ease. How Abdul wished he could fly like those beauties in the air!

(4) This passion for flying, aroused by the beautiful birds, later inspired Abdul Kalam to design India's first rocket which successfully sent a satellite Rohini, into orbit on 18th July 1980. It was called the SLV-3 (Satellite Launch Vehicle). At the time when Abdul was growing up, no one had even dreamt of such a happening.

(5) Rameshwaram, where Abdul was born on 15th October 1931, was a small town with narrow streets lined with old houses made of limestone and brick. The town was famous for its Shiva Temple. Abdul stayed in the house with his father, mother, brothers and sister and led a secure and happy childhood.

**Q.7. very strong feeling (para 4)**

**Q.8. well known to many people (para 5)**

**Note: Read the following passage carefully.**

How does television affect our lives? It can be very helpful to people who carefully choose the shows that they watch. Television can increase our knowledge of the outside world; there are high quality programmes that help us understand many fields of study, science, medicine, the different arts and so on. Moreover, television benefits very old people, who can't leave the house, as well as patients in hospitals. It also offers non-native speakers the advantage of daily informal language practice. They can increase their vocabulary and practice listening.

2. On the other hand, there are several serious disadvantages of television. Of course, it provides us with a pleasant way to relax and spend our free time, but in some countries people watch television for an average of six hours or more a day. Many children stare at the TV screen for more hours a day than they spend on anything else, including studying and sleeping. It's clear that TV has a powerful influence on their lives and that its influence is often negative.

3. Recent studies show that after only thirty seconds of television viewing, a person's brain 'relaxes' the same way that it does just before the person falls asleep. Another effect of television on the human brain is that it seems to cause poor concentration. Children who view a lot of television can often concentrate on a subject for only fifteen to twenty minutes. They can pay attention only for the amount of time between commercials.

4. Another disadvantage is that television often causes people to become dissatisfied with their own lives. Real life does not seem so exciting to these people. To many people, television becomes more real than reality and their own lives seem boring. Also many people get upset or depressed when they can't solve problems in real life as quickly as television actors seem to.

5. Before a child is fourteen years old, he or she views eleven thousand murders on the TV. He or she begins to believe that there is nothing strange about fights, killings and other kinds of violence. Many studies show that people become more violent after viewing certain programmes. They may even do the things that they see in a violent show.
